

Grigorii Barabanov

Senior Full Stack Engineer | Node.js & TypeScript

grishbar@mail.ru | +7 (967) 907-82-34
github.com/grishbar | linkedin.com/in/gregory-barabanov

Software engineer and tech lead with 8+ years of total experience, delivering backend services and frontend features with Node.js, TypeScript, and React. Skills include Express, PostgreSQL, REST APIs, and microservices, with additional experience in NestJS, Next.js, and Vite. Lead a team of 8 engineers, own delivery from planning to production, and collaborate with product and QA. Bring hands-on experience modernizing legacy systems and shipping user-facing products.

01 EXPERIENCE

Backend Engineer / Tech Lead

Navio | 05.2024 - Present | Node.js, TypeScript, Go, Python

Lead a team of 8 engineers building teleoperations software that enables human intervention when autonomous vehicles need assistance.

- Maintain and extend existing Python microservices and build new backend services in Go; work across a backend stack that also includes Node.js.
- Built a staff permissions service from scratch using Node.js and TypeScript, implementing backend business logic to manage access to autonomous-vehicle controls.
- Built a Mattermost bot in Go connecting 3 internal systems: Jira, Confluence, and the deployment pipeline. Supports 3 workflows: vehicle environment switching, deployment triggers, and AI-assisted project Q&A via Cursor CLI.
- Delivered a local teleoperation system for controlling vehicles from a laptop over a local network, without relying on external infrastructure.
- Own feature delivery from planning to production, coordinate with product and QA, and contribute to frontend implementation. Mentored 1 mid-level engineer to senior-level proficiency.

Senior Backend Engineer

VK | 10.2022 - 05.2024 | Node.js, TypeScript, PHP, Go

Worked on news feed and social product features for VK, serving 50M+ daily active users.

- Developed backend functionality in PHP and Go and contributed to migrating services from the legacy PHP stack to Go.
- Delivered user-profile features using Node.js and TypeScript alongside React, contributing to an approximately 5% increase in social interaction metrics.
- Also contributed to frontend modernization: rewrote vk.com/friends/* pages from legacy PHP + JavaScript to React, Effector, and TypeScript, and improved feed-page TTI and FCP by approximately 7%.

PERSONAL PROJECT

NextShift | React Native + Firebase

Built and released my own mobile application using React Native and Firebase, taking the product from development to release.

Grigorii Barabanov

Senior Full Stack Engineer | Node.js & TypeScript

01 EXPERIENCE / CONTINUED

Backend Engineer

Yandex | 09.2020 - 10.2022 | Node.js, TypeScript

Middle Backend Engineer: 05.2022 - 10.2022

Junior Backend Engineer: 09.2021 - 05.2022

Trainee Backend Engineer: 06.2021 - 09.2021; 09.2020 - 01.2021

Worked across Yandex Zen, Yandex Business Trips, and internal products, developing backend functionality in Node.js and TypeScript alongside React frontend features.

- Built a unified Node.js / TypeScript API for multiple service providers, enabling new provider integrations with 0 frontend code changes through a reusable integration interface.
- Integrated Yandex Messenger, Yandex Notifications, and other Yandex services into Business Trips.
- Delivered 2 shared developer tools: an NPM package for project icons, fonts, and colors, and a browser extension for code-review comments.
- Conducted technical interviews and onboarded new engineers.

02 TEACHING & MENTORING

Part-time | 06.2021 - Present

- Created course content for Frontend Developer programs at Yandex Practicum.
- Mentored students at Yandex Summer Frontend School, supported coursework, and guided a student team through building a project from scratch.
- Lectured and mentored students at Bauman Moscow State Technical University in collaboration with VK.

03 TECHNOLOGIES

Languages & backend: TypeScript, JavaScript, Node.js, Express, NestJS; REST APIs, microservices, service integrations; Go / Golang, Python, PHP.

Databases & BaaS: PostgreSQL, MongoDB, Firebase

Infrastructure & tooling: Docker, Nginx, Git, GitHub Actions, deployment automation, NPM package authoring.

Frontend & mobile: React, React Native, Next.js, Vite, Effector, Redux, React Hook Form, TanStack Query / Table / Router / Form, HTML, CSS, LESS, SASS / SCSS.

AI & integrations: LLM integration, prompt engineering, Cursor CLI, Mattermost bots, Jira, Confluence.

04 LANGUAGES

English - C1 | Russian - Native

05 EDUCATION

Ural Federal University named after B.N. Yeltsin

2016 - 2021 | Ekaterinburg

Applied Computer Science, Institute of Natural Sciences and Mathematics
